SUMMARY

Backend Engineer specializing in scalable cloud-native platforms using Node.js, FastAPI, and AWS. Experienced in AI integrations, serverless architectures, and high-performance APIs. Currently working with a Dubai-based growth tech platform; open to relocation to Qatar and Saudi Arabia.

EXPERIENCE

- Software Engineer**08/2024 – Present
*Platformance.io — Growth Technology Platform (Dubai, UAE)*Remote
 - Developed backend services for **Superview**, integrating **Google Vertex AI** and external APIs; deployed on **AWS Elastic Beanstalk** with CI/CD.
 - Built serverless workflows using **AWS Lambda** and the **Serverless Framework**, automating campaign scheduling and reducing manual operations.
 - Engineered backend for **PerformR**, integrating **Trackier**, **Temporal**, and secure authentication (**Clerk + JWT**).
- Associate Software Engineer (Part-time)**02/2024 – 08/2024
*Agilosoft*Karachi, Pakistan
 - Built scalable backend services using **.NET** and **Entity Framework**, improving reliability and performance.
 - Developed **RESTful APIs** enabling workflow automation and third-party integrations.
 - Optimized **PostgreSQL** queries and indexing, enhancing database efficiency.
- Backend Intern**07/2023 – 08/2023
*Bykea (10M+ users)*Karachi, Pakistan
 - Enhanced backend functionality using **Node.js** for high-traffic services.
 - Optimized routing using **Express.js** and **Fastify**.
 - Collaborated on API and DB improvements, reducing development time by 30%.

PROJECTS

- Superview**09/2024 – Present
FastAPI, PostgreSQL, Vertex AI, AWS | Live
 - Led backend development for an AI-powered contextual advertising platform enabling YouTube discovery and brand safety analysis.
 - Deployed containerized services on **AWS Elastic Beanstalk** using Docker and GitHub Actions CI/CD.
 - Implemented serverless workflows with **AWS Lambda** to automate campaign activation.
- PerformR**07/2025 – Present
Express.js, TypeScript, PostgreSQL, Temporal, AWS | Live
 - Developed backend APIs for an influencer marketing platform managing campaigns, coupons, and performance tracking.
 - Integrated **Trackier**, **Temporal**, and OneSignal for workflow automation and real-time notifications.
 - Implemented secure authentication and scalable deployments with Docker and CI/CD.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C#, Node.js
Frameworks: FastAPI, Django, Express.js, React.js, .NET MVC
Databases: PostgreSQL, MySQL, MongoDB, Redis, BigQuery
Cloud & DevOps: AWS, GCP, Docker, GitHub Actions, Serverless Framework
Tools: SQLAlchemy, Drizzle, Celery, YOLOv8

ACHIEVEMENTS & CERTIFICATIONS

Microsoft Learn Student Ambassador (MLSA) • Google DSC Core Team • IBM Node.js Certification • LinkedIn Learning Node.js

EDUCATION

NED UniversityKarachi, Pakistan
*BS Computer Science*2020 – 2025
