EXPERIENCE

Software Engineer (Full-time)

08/2024 – Present

Platformance.io – Growth Technology Platform (Dubai, UAE)

Karachi, Pakistan (Remote)

- Developed backend services for **Superview**, a contextual advertising platform for YouTube, integrating **Google Vertex AI** and external APIs; deployed on **AWS Elastic Beanstalk** with CI/CD pipelines.
- Implemented serverless workflows with **AWS Lambda** and the **Serverless Framework** to automate campaign scheduling, improving efficiency and reducing manual effort.
- Engineered backend for **PerformR**, an influencer marketing platform, integrating **Trackier**, **Temporal**, and secure authentication using **Clerk** and **JWT**.

Associate Software Engineer (Part-time)

02/2024 – 08/2024

Agilosoftware - Reliable software solutions for growth, trusted by leaders like Engro Foods and 1Link

Karachi, Pakistan

- Built scalable backend services with **.NET** and **Entity Framework**, ensuring reliable performance.
- Developed **RESTful APIs** to support business workflows and client integrations.
- Worked on **PostgreSQL** queries and indexing to enhance database efficiency.

Backend Intern

07/2023 – 08/2023

Bykea - Pakistan's top ride-hailing app (10M+ users), rivaling Uber and Yandex

Karachi, Pakistan

- Gained hands-on experience with **Node.js**, enhancing backend functionalities for over 10M users.
- Explored frameworks like **Express.js** and **Fastify** to optimize routing and structure.
- Collaborated with senior developers to learn API design and DB management, reducing development time by 30%.

PROJECTS

Superview | *FastAPI, PostgreSQL, SQLAlchemy, Vertex AI, SearchAPI, Docker, AWS, GitHub* 09/2024 – Present

- Led backend development for an API-driven contextual advertising platform, powering YouTube video discovery and **AI-based brand safety analysis** via **Google Vertex AI** and **SearchAPI**.
- Built scalable background processing with multiprocessing and deployed containerized services on **AWS Elastic Beanstalk** using **Docker** and **GitHub Actions** CI/CD.
- Developed a serverless backend workflow with **AWS Lambda** and the **Serverless Framework** to automate campaign activation through scheduled API calls.

PerformR | *Express.js, TypeScript, PostgreSQL, Drizzle, Temporal, Trackier, Docker, AWS* 07/2025 – Present

- Developed the backend API for PerformR, an influencer marketing platform managing campaigns, coupon codes, and performance tracking.
- Integrated with **Trackier**, **Temporal**, and third-party services for campaign management, background workflows, and real-time notifications using **OneSignal**.
- Implemented secure authentication (**Clerk + JWT**) and deployed scalable services with Docker on **AWS Elastic Beanstalk** with CI/CD using **GitHub Actions**.

TECHNICAL SKILLS

Languages & Runtime: Python, TypeScript, JavaScript, C#, Node.js, HTML/CSS;

Frameworks: FastAPI, Django, Express.js, React.js, Fastify, .NET MVC;

Databases: PostgreSQL, MySQL, MongoDB, Redis, SQLite, BigQuery;

Cloud & DevOps: AWS, GCP, Docker, GitHub Actions, Serverless Framework;

Tools & Libraries: SQLAlchemy, Drizzle, Celery, YOLOv8;

ACHIEVEMENTS AND CERTIFICATIONS

BETA MLSA: Microsoft Learn Student Ambassador at MLSC-UIT

WEB Developer GDSC: Core Team Member at Google DSC-UIT

Developing Back-End Apps with Node.js and Express By IBM : Coursera - IBM

Learning NodeJS By LinkedIn Learn: LinkedIn Learn - Alexander Zafir

EDUCATION

NED University

BS. Computer Science

Karachi, Pakistan

10/2020 – 02/2025
